SECURE TRANSPORT SYSTEMS

BACK THE BLUE

PROTECTING THOSE WHO PROTECT US SINCE 1989

From our family, to yours, thank you for your interest in American Aluminum Accessories, Inc. We manufacture a wide variety of products from high-quality toolboxes to an extensive line of products designed to meet the ever-changing needs of the Law Enforcement Community.

In 1989, we began as a manufacturer of our superior quality CamLocker toolboxes. In 1992, due to the demand for safe, secure canine transport for a nearby Law Enforcement Departments, we introduced the very first in-vehicle EZ RIDER K-9 Container.

We have continuously grown and expanded our products, catering to the needs and wants of our valued customers and high profile clientele. Over the years as your needs have changed, we have evolved and expanded our products to include Inmate Transport Systems, Vault Systems, K-9 Training Aids, Contraband Containment and Animal Control Systems.

We strive daily to manufacture the finest products available and we always welcome the input you provide to continue our improvements. We would like to thank each and every one of our valued customers. It is with our deepest appreciation we thank you, the Law Enforcement Community for your dedication and service.

We look forward to serving you.

Sincerely,

Thomas A. Swain

CEO of American Aluminum Accessories, Inc.

HANDLERS CHOICE

From the inception of K-9 transport, American Aluminum has taken input from Officers in the design and function of the various platforms. From the standard window and door panels to the RESCUE and COOLGUARD systems created to keep their K-9 partners safe, Officers from around the country have helped refine the platforms to add safety, and performance to the product.

The utility of small department vehicles was enhanced when we were asked to make a unit for the K-9 officer and an inmate, the 1/3-2/3 unit was created. We value the safety and security of the officers using our K-9 inserts as well as comments and suggestions for design modifications.

We would like to thank and honor those in the field of law enforcement for their contribution and their dedication to serve and protect. Our over twenty-five year relationship with the K-9 community has made the American Aluminum K-9 Platform systems the Handlers Choice.

Many companies say it: "American Craftsmanship"

But we live it!

Our aluminum fabricators can make just about anything and they have proved it over and over through design and development of innovative aluminum transport solutions used by Law Enforcement agencies world wide.

Yes, we use state of the art CNC controlled fabrication machinery, but every K-9 Unit is welded and assembled by hand, by craftsmen who have perfected the process over the 25 plus years we have been in business.

With a steady hand and an eye for quality, our fabricators produce a solid and dependable K-9 insert that will handle the rigors of police work for years to come.

PLATFORM SYSTEMS:

MAXIMIZE YOUR K9 PARTNER'S COMFORT

OUR ATTENTION TO DETAIL MAXIMIZES YOUR K-9 SPACE

The Original E/Z Rider K9 Platform unit is fully contoured for vehicle specific, perfect fit. The K9 Insert is made of .125 mill finish aluminum, with a .080 lid and .063 door panels. The unit is fully welded with vertical front bars for added strength and rear window for easy cleaning. Seamless Base Pan fully welded and specific fit contouring to allow canine leg safe ease upon entry and exit. Base extends door sill to door sill utilizing all available space and allowing for easy rinsing and cleaning without damage to vehicle. Canopy top allows for maximum airflow from vehicles with existing factory rear A/C and heat. All platform units include perfectly contoured Aluminum Window Guards and Aluminum Door Panels. Window Guards are powder coated black and hinged to allow for easy cleaning and maintenance. Door Panels are contoured, smooth, flat design for ease of install. Complete Hardware kit with installation instructions included.

THE ORIGINAL MAKERS OF THE 1ST IN-VEHICLE PLATFORM K-9 CONTAINER FOR POLICE VEHICLES

Powder coat tested for 1000 hour salt fog chamber test per ASTM. Powder coat process was rated excellent.

Our EZ Rider Platform System (performed on a F150 truck and Ford Interceptor SUV) tested for roof mounted

airbag deployment compatibility and our system was rated excellent. Test performed by Karco Engineering

Sedan models weight 280 lbs. and SUV models weight 320lbs.

POLICE DEPARTMENT TESTIMONY

Coconut Creek Police Department Canine Officer Brian Valenti and his K-9 partner Lucky were on a traffic stop.

A suspected drunk driver struck the rear of Officer Valenti's 2013 Chevrolet Tahoe. The crash was severe enough to propel the Tahoe into the original violator's vehicle. Thankfully no officers were seriously injured, the American Aluminum kennel installed in the Tahoe was not compromised and K-9 Lucky was not injured.

"The American Aluminum cage was not compromised at all and I feel as if this was the reason that my K9 partner escaped injury and/or death. I would like to thank you for making such an excellent product. "

**K9 Officer Brian Valenti
Coconut Creek PD**

DUAL TRANSPORT:

$\frac{1}{3}$ INMATE TRANSPORT + $\frac{2}{3}$ K9 TRANSPORT

The $\frac{1}{3}$ - $\frac{2}{3}$ Transport systems enhance the utility of your vehicle. The unit provides ample room in the rear seat for your K-9 Partner ($\frac{2}{3}$) and suitable secure transport for inmates ($\frac{1}{3}$). High strength aluminum dividers keep your passengers in their designated spaces and seat belts are provided for inmate safety in transport.

Driver side K-9 deployment is standard, with passenger side available for specific models.

A safe, convenient solution for dual K-9/Prisoner transport needs. Our E/Z Rider 1/3rd Prisoner, 2/3rd K9 Unit is designed to carry a prisoner in a confined space for a short period of time, with the Officer and the K-9 Officer's protection and safety foremost in mind. The K-9 portion has all the design and safety features of our platform units. The Prisoner portion either utilizes the existing vehicles rear jump seat or an aluminum prisoner seat is built complete with AMSAFE lap-style seat belt restraints for security and protection of occupant. An aluminum rectangular panel with clear Polycarbonate window for visibility separates the occupant from the canine. All 1/3rd, 2/3rd units include window guards and door panels.

*Passenger side exit available for: Tahoe, Interceptor SUV.

E/Z REMOVABLE DIVIDER

Our E/Z Divider allows you to convert your existing platform unit into a dual canine transport containment system. The divider is removable and fully adjustable. Constructed of aluminum with a center door and sliding latch to allow access to both sides.

E/Z SPILL PROOF WATER DISH

A Must For Your K9 Transport System Our E/Z Spill Proof Water Dish is the perfect accessory to any and all of our K9 transport systems. Constructed of mill finish aluminum with 1 gallon water capacity, comes with a mounting bracket. Dish comes with drain plug and dish slides on and off mounting bracket for easy use and cleaning.

E/Z RUBBER MAT

A Must For Your K9 Transport System. The E/Z Rubber Mat is a bare bones necessity for any and all of our K9 transport systems. Heavy duty 1/2" thick for maximum durability and custom fit to your specific E/Z Rider Transport model, it provides a safe, comfy barrier for your canine from the aluminum platform base

E/Z R.E.S.C.U.E. REMOTE DOOR OPENING SYSTEM

The E/Z Rescue Remote Door Opening System allows the Officer to unlock, open and release the K-9 via remote transmitter. Should the officer be outside of the patrol car and need immediate assistance, his K-9 partner is a push of a button away. E/Z Rescue comes complete with main receiver & transmitter, actuator motor, small keychain remote, and hydraulic lift cylinder. Installation instructions and free technical support are included.

E/Z COOLGUARD TEMPERATURE MONITOR/ALERT

Our E/Z Coolguard gives you peace of mind and will self-activate to rapidly cool your canine when dangerous inside vehicle temperatures are detected. Installation instructions and free technical support are included. Full 1 year warranty against any defects.

E/Z COOLGUARD PAGER

Sold separately as an additional option for our E/Z Coolguard, the Pager ensures that should you be outside of hearing range for the horn alarm, you will be notified via page that your Coolguard system has been activated. Installation instructions and free technical support are included. Full 1 year warranty against any defects.

INMATE TRANSPORT UNITS

American Aluminum manufactures safe and secure transport systems for inmates, originally designed to slide in the Ford Econoline vans. A lot has changed since the first units were designed, manufactured and installed 25 years ago. Multi-compartment designs, Polycarbonate covers on openings, and emergency front exit windows are an example of new feature that have been added over the years.

Standard features now include seat belts for every passenger, 6000 pound "bursting strength" slam latches with lockable T-handles, LED security recessed lighting, Non-skid seating covering and a smooth interior, sealed to prohibit hiding of contraband.

The units slide into Ford Transit, GM, Dodge, Mercedes and Nissan vans and come in five different compartment configurations to best fit the vehicle use to the agencies needs.

Screen systems are available for passenger vans as well.

American Made Craftsmanship means a solid Inmate transport containment unit that is not going to rattle, not going to rust, and nobody gets in or out until you let them.

- Aluminum interior encasement
- Secured driver cab
- Interior lighting
- Easy clean interior unit
- Individual locking compartment doors
- No rust aluminum interior unit
- 6000 lb slam latch lock with Camlocker T handles, all locks keyed the same
- Rear and Side steel door steps
- Diamond plate aluminum
- Light weight to maximize and stay under MFG Gross vehicle weight rating
- Front emergency exit drop down windows for every compartment
- Perforated center sections for viewing of prisoners with clear polycarbonate over for protection
- Welded edges for easy cleaning
- Welded and riveted connections to provide quiet ride
- Units can be transferred into like vehicles models
- AC hoses and hook ups included
- Non skid prisoner seating
- Lap style seat belts
- Light gray powder coating on insert

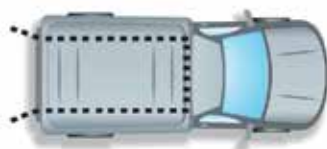

INMATE TRANSPORT

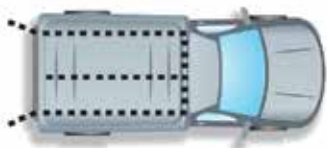

- Video record/monitoring system
- Audio listening and recording
- Back up sensors
- Loading lights
- Auxiliary AC and Heat units
- Torso restrains
- Padded seats
- Bar style restrains

INMATE TRANSPORT UNIT STANDARD & EXTENDED VAN

ONE (1) COMPARTMENT UNIT:

TWO (2) COMPARTMENT UNIT:

TWO (2) COMPARTMENT UNIT:

THREE (3) COMPARTMENT UNIT:

FEATURES:

- Designed to Accommodate Factory Installed Rear Air or Auxiliary HVAC System.
- Modular design for transfer from one van to another van of the same make and length.
- Built-in seating with Non-Skid-resistant covering over all seating area.
- High strength seat belts. (48" and 60" long). 60" accommodates larger size prisoners.
- Emergency front exit window provided with every unit, access from either side
- Doors include a Poly Carbonate covered security window/view-port 21 1/2"W x 20"H
- 6,000 pound "bursting strength" Slam latch with key lockable Cam-Handle locks.
- NO ACCESS to any lock, handle, or opening/closing device from the inside the unit.
- L.E.D. security-recessed interior compartment lighting is included
- All controls accessed from control switch in the driver area in lockable console.
- Overhead ductwork for rear factory A/C & Heat or for Auxiliary A/C and heat included.
- The Front Bulkhead allows for First Aid and Fire Extinguisher Installation.
- Smooth interior for safety and sealed to prevent hiding of any contraband.
- Non-rusting aluminum containers allow less down-time for washing and disinfecting.
- Light weight for fuel Efficiency and vehicle longevity.
- 3-Year Warranty on the basic Modular Unit.
- 1-year warranty on interior LED lights.

SCREEN & DOOR PANEL PACKAGES:

Quick install E/Z Security Screen Systems for Ford or GM 12 & 15 Passenger Vans.

Complete Window Coverage

STANDARD LENGTH/12 PASSENGER

EXTENDED LENGTH/15 PASSENGER

- 16 gauge steel window guards
- 0.125" thick aluminum adjusting front partition

- ½" holes punched in window guards & 1 ½" holes punched in front partition

OUR ATTENTION TO DETAIL SECURES TRANSPORTATION

Screen systems are available to convert passenger vans into secure inmate transport vehicles.

Screen systems are available for Ford Econoline, Transits and GM 12 and 15 passenger vans that include complete window coverage made from 14-gauge steel with 1 ." punched square openings.

An 11-gauge aluminum front partition with 1 ¼" x 1 ¼" punched radius squares.

Vault Systems are designed for Law Enforcement use to keep equipment and ordinance secure in Sedan or SUV vehicles. The Vault systems are lightweight, yet rugged, built of Aluminum tread plate. Slide out drawer(s) come fully carpeted with our lockable CamLocker locking mechanism.

Standard features include: CamLocker locking mechanism, interior carpet, exterior top carpet. Interior weapon foam (optional), a top basket and black matte powder coat. Load it and lock it knowing your equipment is safe and secure.

THE **ULTIMATE** IN QUALITY AMERICAN MADE **CRAFTSMANSHIP**

Hand crafted and assembled by expert craftsmen means the vault will operate as designed for years and years to come.

Your high value equipment and ordinance will be secure for transport locked tight with the CamLocker system with proprietary keying mechanism available only through American Aluminum.

Lightweight and built to last. American Aluminum Vault systems come in many configurations to fit your vehicle and secure the equipment you use to do your job. Built for Sedans and SUV's, we have a Vault that will exceed your transport needs.

CUSTOM VAULTS

K9 OFFICER MARCO - RETIRED

Our relationships with Law Enforcement agencies around the world, has given American Aluminum the opportunity to design and manufacture many variations of our Vault Systems. Agencies have specified number of drawers, size of drawers, and location. We have even designed command centers with pull out marker boards to communicate with the team on-site. Pricing and availability will vary with the requested design. A sales professional stands ready to talk with you about the available configurations shown here.

The Up Vault was designed for Sedans and SUV's that have the spare tire in the rear of the vehicle and a standard Vault would cover the spare. Up and out of the way with full access to the sliding drawer, the Up Vault maximizes the secure storage area of your vehicle.

Manufactured with the same diamond plate aluminum, the Up Vault will perform with no rust, no rattle, and the CamLocker locking mechanism will keep your equipment and weapons secure.

American Aluminum manufactures two high quality Animal Control products. Slide-in truck bed units designed to slide-in standard pick-up trucks and Nine- Ten Compartment built-in units installed in cargo vans.

Made from high quality aluminum, the units are lightweight, which promotes fuel economy and will never rust, providing years of dependable service. The rugged aluminum can handle anything your animals try to do to escape and the floor drains in each compartment allow for easy cleaning.

Controlling animals is hard enough without struggling to keep them safe and secure for transport. American Aluminum Animal Control units have been designed by officers for officers.

THE ULTIMATE IN QUALITY AMERICAN MADE CRAFTSMANSHIP

The last thing you need when handling a stray animal is fighting with your transport vehicle. Attention to detail is a trademark at American Aluminum and we have designed in features that AC officers have told us helps them do their jobs.

The craftsmanship is evident in the custom fit and ease of use for the animal control officer. Every element of the design is tested before the vehicle is released by production and reviewed by customer service before you are notified the vehicle is ready for service.

ANIMAL TRANSPORT

The in van Animal Control unit was designed to fit the top selling cargo vans from Ford Transit, GM, and Dodge. Form fit to maximize transport space and designed with the animal control handler in mind. Secure storage for the officer's gear and made from lightweight, easy to clean aluminum. ** Must be installed at American aluminum ***

INCLUDES:

- Insulated walls and ceiling
- Aluminum sheeting of walls and ceiling
- All doors have catch pole perforations for easy access
- AC vent into each cage
- Drain in each cage
- All locks keyed the same
- Folding t handle locks
- LED lighting
- Removable pan in each cage
- Large cages have $\frac{3}{4}$ " perforations
- Small cages have $\frac{1}{4}$ " perforations
- Lockable storage compartment behind bulkhead
- Diamond plate floor
- Polycarbonate covered window on the center of the bulkhead
- ** rear passenger cage top and bottom is accessible from inside the van

ANIMAL CONTROL: SLIDE IN

The Animal Control Slide-in unit is designed to fit into the bed of a pick-up truck which instantly converts the vehicle into an Animal Control Unit. The high grade aluminum means the unit will be in service for many years and can be re-installed into a new vehicle for years and years of service from the unit. The unit includes secure storage for the officer's gear. Constructed from lightweight, easy to clean aluminum, the individual animal compartments have drains for easy cleaning, fans in each compartment, protected LED lighting, heavy duty nontoxic rubber liner, powder coated WHITE, top rail, all lockable compartments, all locks keyed the same, catch pole in each door.

INCLUDES:

- Protected fans
- Protected LED interior LED lighting
- Drain in each compartment

- The window obstacle has removable slats which allow for the obstacle to be set at 18", 24", 30" or 36". Top section slats are fixed at 73".
- Tunnel Crawl is 18" in diameter and 8' in length
- Barrel: 24"D x 35" • 24"D x 70" • 24"D x 105"L

HOME KENNELS

HOME KENNELS - PRODUCT TESTIMONIAL

On April 4th, 2008 a tornado went through Madison, MS. Our K9 officer was at home when it went through the city. His K9, Ax, was in his kennel that was purchased from American Aluminum Accessories. The tornado blew a large oak tree, approximately 24-28 inches in diameter, down and a large limb and part of the upper third of the tree landed on the kennel. Ax was trapped inside but was unharmed. The kennel sides and roof were damaged. The sturdiness of the kennel held the tree up and saved K9 Ax.

I was very pleased with the kennel and how it accommodated AX as was his handler. Now we have a higher regard and faith in the kennel system. The strength and durability saved one K9's life. We are currently ordering a second kennel for our second K9.

Thank you for a very dependable product.

Sincerely,

Bill Slade

Ret. Chief of Police
